BACUTI
SUSTAINABILITY SOFTWARE FOR ENTERPRISES

CASE STUDY
STEEL FABRICATION COMPANY

www.bacuti.com | hello@bacuti.com

BACKGROUND

- $150M revenue, 3 plants, 100s of SKUs & small corporate office
- Exporting to customers in Europe, US and across India
- Industries served: automotive, tractor, construction, mining and railway
- Need emissions report for regulatory (CBAM) requirements

"Many of our customers are asking for product emissions in their RFPs. You helped us calculate this quickly and accurately"

— CFO

CHALLENGES

- Customers demanding product emissions in RFP/RFQs
- Limited sustainability experience
- Constant change in operations

BENEFITS

- Reports generated in less than 60 days enabled them
  - to respond quickly to their customers
  - participate in new RFPs that require sustainability data
- Identified green SKUs that reduce CBAM taxes based on emissions calculations
- Costs were 50% cheaper than hiring a consultant

ABOUT BACUTI

Cloud based sustainability software to help enterprises meet net-zero goals.

- Generate regulatory reports incl. CBAM
- Calculate Scope 1,2 & 3 Product level emissions
- Share emissions data across supply-chain
- Plan and forecast Sustainability metrics
